

ANMOL HITESHKUMAR BRAHMBHATT

Philadelphia, PA | Anmolbrahmbhatt1310@gmail.com | (209) 313-8516 | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Software Engineer with 3+ years of experience delivering scalable, production-ready applications across web, backend, and AI-driven domains. Proficient in **JavaScript, Python, TypeScript, React, Node.js, and Postgres**, with a strong foundation in microservices, REST APIs, CI/CD, and cloud deployment. Leading end-to-end product delivery, optimizing performance, and integrating AI (GPT-4, Whisper) into real-time systems. Thrive in fast-paced environments with a focus on user experience, code quality, and cross-functional collaboration.

PROFESSIONAL EXPERIENCE

Software Engineer – Vality Engineering LLC | Remote (India → US)

March 2022 – Present

- Developed and shipped 30+ full-stack features across major production systems using **React.js, Next.js, Node.js**, and **PostgreSQL**.
 - Created RESTful services and orchestrated asynchronous job queues to support scalable workflows, improving backend throughput by 40%.
 - Refactored legacy monoliths into decoupled microservices, increasing maintainability and reducing regression bug frequency by 50%.
 - Collaborated with product managers, UI/UX designers, and DevOps teams to accelerate development cycles, delivering sprint goals 90% on time.
 - Integrated **GPT-4, Whisper**, and **LangChain** into internal tools to automate content generation by 100%, voice commands, and user analytics.
 - Established testing pipelines using **Jest** and **Postman**, improving API reliability and reducing post-deployment failures by 25%.
 - Led implementation of role-based access control, 2FA, and audit logging to meet data protection requirements across internal tools.
 - Maintained infrastructure on **AWS** and **Firebase**, using GitHub Actions for CI/CD and Docker for environment consistency.
-

PROJECT SPOTLIGHT

Ai-Powered Restaurant OPS Platform

Tech: Next.js, Flutter, Typescript, Postgres, Firebase

- Designed and deployed a **full-stack restaurant management system** from scratch using **Next.js, Flutter, TypeScript, Postgres**, and **Firebase**.
- Built **voice-command automation** (GPT-4 + Whisper) to update table status, manage inventory, and generate real-time insights.
- Mimicked real POS workflows — including seat management, live kitchen dashboards, and automated end-of-day reports.

Financial Dashboard for Treasury Teams

Tech: Next.js, Node.js, Redis, PostgreSQL, Docker

- Built an internal financial dashboard for real-time metrics like cash flow, tax liabilities, and portfolio balances.
- Added caching layer with Redis Streams, improving analytics load speed by 65%.
- Designed permission-based views to restrict access across finance and operations departments.

AI-Based Inventory Forecasting System

Tech: Python, Pandas, FastAPI, Firebase Functions

- Developed backend for intelligent inventory forecasts using real-time sales data and ML trend projections.
 - Reduced forecasting error rates by over 30% compared to previous Excel-based manual processes.
-

EDUCATION

M.S. in Computer Science – Rowan University (GPA: 3.41) – *May 2025*

B.E. in Computer Engineering – Gujarat Technological University (GPA: 3.81) – *May 2023*

TECH STACK/SKILLS

- **Languages:** JavaScript, TypeScript, Python, SQL, Bash
- **Frontend:** React.js, Next.js, Tailwind CSS, HTML5
- **Backend:** Node.js, Express.js, FastAPI, Firebase Functions
- **Databases:** PostgreSQL, MongoDB, Firebase Realtime DB, Redis
- **APIs:** REST, WebSockets, GPT-4, OpenAI, LangChain
- **DevOps & Infra:** Docker, GitHub Actions, Vercel, AWS (EC2, S3), Firebase
- **Testing:** Postman, Jest, Cypress
- **Other Tools:** Git, Figma, Trello, PostHog, Notion
- **Practices:** Agile, TDD, Microservices, CI/CD, Product-Driven Development
- **Soft Skills:** Platform Thinking, Technical Documentation, Cross-Team Collaboration
